STATESMEN

I Strongly feel that all politicians who aspire to enter the state legislatures or the central parliament would do well to go through the wealth of material that has been prepared by IIG. Irrespective of whether they are on the ruling side or in the opposition, will not come out in flying colors, in their respective fields, but will ultimately command greater respect and compliance from their bureaucrats, too.

At a personal level, those in governance need a complete understanding their personal ethics and morals and their concept of equity, sensitivity to others and acceptance of diversity. I particularly like the attention to practical action as part of the course through internships. The involvement of many thinkers in developing the idea ensures that the outcomes are tested in the light of long experience of achievers that you have assembled in to a think tank.
Best regards
Mr Narasimhan Srinivasan
